Specification

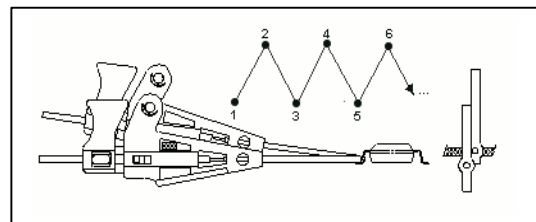

m Ohms < 120
T °C -20 to +80
< 30VAC <60VDC

Challenger Clip

The mini challenger Clip is one of the most precise and smallest product on the worldsize market. Its sizes involve tests on the closest SMD boxes (DIP... and so on)

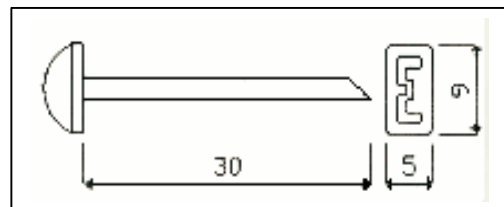

A judicious positioning, as shown with the drawing involves simultaneous testing in line point by point

Holding Rods

The use of holding rods reinforces positioning and ensures genuine connections during measurements
